

Post-Session Questionnaire: Introduction to Software Testing Activity

Please complete this survey about the recent software testing class activity. Your honest feedback is valuable for improving future sessions.

* Indicates required question

1. **Participant Code** – Please enter the same participant code you used in the pre-session questionnaire. *

(Create your unique participant code using the following format:
last 2 digits of your phone number + birth month (MM))

Example:

45 + 07 → **4507**

Use the same code in both questionnaires.)

SECTION A: Core Knowledge Check (Post-Class Assessment)

2. 1. A program is supposed to compute the sum of two numbers. For input (2, 3), it returns 6. *

What are you doing when you notice this problem?

Mark only one oval.

- ☐ Debugging
- ☐ Testing
- ☐ Development
- ☐ Compilation

3. 2. After detecting the issue, you inspect the code and find: *

```
return a + b + 1;
```

What are you doing now?

Mark only one oval.

- ☐ Debugging
- ☐ Testing
- ☐ Integration testing
- ☐ Execution

4. 3. Which scenario represents unit testing? *

Mark only one oval.

- ☐ Testing the full login system
- ☐ Testing a single function in isolation from other components
- ☐ Testing system performance
- ☐ Testing user interface

5. 4. Which scenario represents integration testing? *

Mark only one oval.

- ☐ Testing a single function
- ☐ Testing UI design
- ☐ Testing interactions between components
- ☐ Testing execution speed

6. 5. A tester checks an ATM by inserting a card and entering a PIN, without knowing how the system is implemented. What type of testing is this? *

Mark only one oval.

- ☐ White-box testing
- ☐ Debugging
- ☐ Unit testing
- ☐ Black-box testing

7. 6. Which activity represents white-box testing? *

Mark only one oval.

- ☐ Testing only inputs and outputs
- ☐ Designing tests based on internal code logic
- ☐ Testing without code access
- ☐ Testing UI behavior

8. 7. Which example represents functional testing? *

Mark only one oval.

- ☐ Checking system performance
- ☐ Testing security vulnerabilities
- ☐ Verifying that login works correctly
- ☐ Evaluating user interface design

9. 8. In the game, the system intentionally introduces faults to check whether tests can detect them. *

What concept does this represent?

Mark only one oval.

- ☐ Mutation testing
- ☐ Integration testing
- ☐ Regression testing
- ☐ Debugging

10. 9. Consider the following code: *

```
int sum(int a, int b) {  
    return a - b;  
}
```

Which test case is most effective at revealing the bug?

Mark only one oval.

- ☐ assertEquals(0, sum(0,0))
- ☐ assertEquals(2, sum(1,1))
- ☐ assertEquals(5, sum(3,2))
- ☐ assertEquals(1, sum(3,2))

11. 10. A test case fails after a recent code change. What is the most appropriate first step? *

Mark only one oval.

- ☐ Delete the failing test
- ☐ Immediately rewrite the entire code
- ☐ Investigate whether the failure is due to a bug in the code or the test
- ☐ Ignore the failure if the program still runs

12. 11. If all tests pass but the system still contains a bug, what does it indicate? *

Mark only one oval.

- ☐ The system is correct
- ☐ The tests are not effective enough to detect the bug
- ☐ Debugging has already been completed
- ☐ The compiler is incorrect

SECTION B: Self-Confidence

13. 12. Please indicate your level of agreement with the following statements: *

Mark only one oval per row.

	1 (Strongly disagree)	2	3 (Neutral)	4	5 (Strongly agree)
I understand the basic concepts of software testing and debugging	☐	☐	☐	☐	☐
I can write a simple test case.	☐	☐	☐	☐	☐
I can identify and debug software errors.	☐	☐	☐	☐	☐
I feel confident analyzing test failures.	☐	☐	☐	☐	☐

SECTION C: Perceived Understanding

14. 13. Please indicate your level of agreement with the following statements: *

Mark only one oval per row.

	1 (Strongly disagree)	2	3 (Neutral)	4	5 (Strongly agree)
The activity helped me understand testing vs debugging	☐	☐	☐	☐	☐
The game improved my understanding of unit testing	☐	☐	☐	☐	☐
I better understand how tests detect bugs	☐	☐	☐	☐	☐
The activity improved my overall understanding of basic testing concepts	☐	☐	☐	☐	☐

SECTION D: Engagement & Motivation

15. 14. Please indicate your level of agreement with the following statements: *

Mark only one oval per row.

	1 (Strongly disagree)	2	3 (Neutral)	4	5 (Strongly agree)
The activity was engaging	☐	☐	☐	☐	☐
The game increased my motivation to learn	☐	☐	☐	☐	☐
I prefer this approach over traditional lectures	☐	☐	☐	☐	☐

SECTION E: Usability

16. 15. Please indicate your level of agreement with the following statements:

Mark only one oval per row.

	1 (Strongly disagree)	2	3 (Neutral)	4	5 (Strongly agree)
The game was easy to use	☐	☐	☐	☐	☐
The interface was clear and understandable	☐	☐	☐	☐	☐
The instructions were easy to follow	☐	☐	☐	☐	☐

SECTION F: Cognitive Load

17. 16. Please indicate your level of agreement with the following statements: *

Mark only one oval per row.

	1 (Strongly disagree)	2	3 (Neutral)	4	5 (Strongly agree)
The activity required significant mental effort	☐	☐	☐	☐	☐
I found some parts of the activity confusing	☐	☐	☐	☐	☐
The difficulty level was appropriate	☐	☐	☐	☐	☐

SECTION G: Open-ended Questions

18. 17. What helped you the most in learning? *

19. 18. What was the most difficult part of the activity? *

20. 19. What would you improve in this activity? *

21. 20. Which concept did you find most difficult to understand, and why? *
